NIGHT VISION CROSSWALK RRFB SYSTEM MODEL ECO RRFB

The K&K Night Vision Crosswalk System puts the spotlight on pedestrians quite literally. The Night Vision System combines our Touch-Free Crosswalk System with ultra bright LED Flood Lighting. Like the Touch-Free system, the Night Vision System is triggered with IR sensors for passive pedestrian activation. Pedestrians pass between the Bollards breaking the IR beam which activates the all of system's lighting. Our Touch-Free Bollards not only trigger the system, but also prevent the spread of disease.

FEATURES

- ▶ IR sensors for passive pedestrian activation
- ▶ FHWA Interim Approval 21
- ▶ ADA Compliant
- ▶ Heavy duty, weatherproof, corrosion resistant construction
- ▶ Automatic light output for maximum efficiency
- ▶ Super bright LEDs for visibility day and night
- ▶ Ultra slim compact design
- ▶ Bi-directional to increase pedestrian visibility
- ▶ Solar powered

The Flood Light is a 30W fixture with a high powered LED chip that features no glare, strong and evenly directed lighting to illuminate pedestrians as well as provide a lighted pathway.

We utilize ultra-bright LED technology for low power consumption while maintaining maximum light output. The bi-directional design warns approaching drives from both sides of the crosswalk.
